

Conference Card Creator Software

Design and produce your conference badges, professionally, in-house

Conference Card Creator software enables easy design and printing of conference and event badges in house.

Why purchase a Conference Card Creator licence?

- You can design your own cards with colour logos, personal details, even barcodes.
- Gives you full control and flexibility to create badges as and when you need them.
- Make considerable cost savings.
- Load and run the Conference Card Creator software on your own PC upon receiving your CD.

How does the licensing work?

- Simply place your order for the Conference Card Creator licence, together with an initial supply of consumables – perforated A4 sheets for printing, conference card holders, clips, chains etc.
- We recommend that you take advantage of our training services, either at Faygate or your own offices, to benefit from clear instruction on all aspects of the software. This can include installation of the software onto your own PC or laptop and entitles you to full support by telephone for the first 30 days.
- If you opt not to have training then we will send you a CD and security device with installation instructions for loading the software onto your PC. A manual is also supplied.

How does the software work?

An operation manual is supplied with the licence giving comprehensive instructions and screen illustrations for easy to follow guidance on how to operate the system.

Five main steps to producing a finished card for your event:

- 1) Make a new project for the event
- 2) Set up the required data fields eg) first name, surname, organisation, position, event name
- 3) Design the layout for the card
- 4) Enter the delegate/attendee personal details (or import from an existing database)
- 5) Print the card

Will the software work on my PC?

You will need:

- a PC or laptop running W2000 or XP
- Pentium 3, 1 GHz or higher recommended
- 512 MB RAM
- SVGA monitor 800 x 600 resolution
- CD ROM

Allow sufficient serial ports for printers and Memowand barcode readers. IDscan barcode readers are downloaded via a USB port.

The application requires 50MB storage.

If you are in any doubt as to whether your PC is suitable, just call the help line with the specification and we will be pleased to advise.

Any A4 paper printer with a Windows driver can be connected for printing of the cards. Adjustments to the print positions are easily made within the software to ensure accurate and consistent printing of the required layout.

What about support?

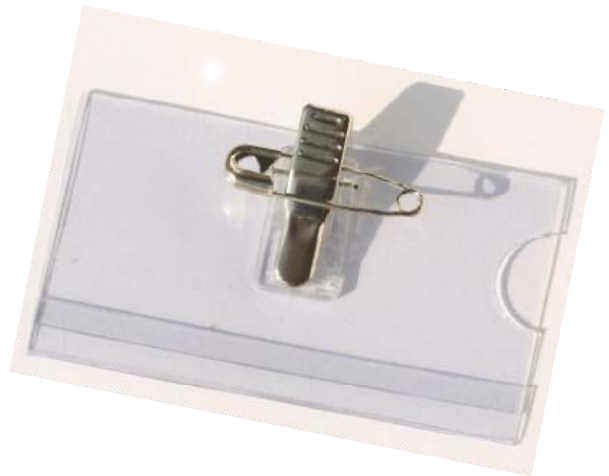

The Conference Card Creator annual support agreement includes a telephone helpline and free of charge software upgrades to ensure you are running the current version of the software with all the latest features.

In addition to technical support, our bureau facilities are also available where we can offer last minute assistance with card production, help cater for large volume issues or provide the option of hiring barcode readers for accreditation or tracking purposes.

What about delivery?

Conference Card Creator software is available from stock as a standard package, as are the materials - perforated sheets for printing 1, 2, 4, 6, 8, 10 or 12 cards per sheet.

Conference card holders, clips, chains, lanyards, conference card caddies - everything needed for producing professional conference and event badges are also supplied ex stock.
